- Gas & powder forced entry

# Stud Welding Applications

## Tapped CD Studs

Used on flat cut letters where longer studs are required or a standoff from a wall is necessary. Also used in a variety of reverse channel letters (illuminated and non illuminated).

## CD Studs and Speed Nuts

Non-threaded studs can be used on routed faces with flat plastic backer.

Threaded studs can be used on flat cut letters, angle mounts and with cap nuts on routed faces.

## All Thread Rod

All thread rod is used in various sign mounting and installation applications. Frequently used with rivet nuts or CD tapped studs to attach letters to walls or raceways.
